## Environmental Policy.

Last updated: 18/11/2022

CDMG takes our environmental responsibility seriously and is omnipresent in all activities conducted by this company.

We also encourage our customers and suppliers to adhere to all environmental regulatory obligations.

We are committed to legal compliance, including pollution prevention and minimisation of our operation's impact on environment through continuous improvement.

Guided by our policies we strive to meet, or surpass, our environmental obligation and objective demonstrated by our commitment to the following actions.

- To increasingly encourage suppliers and subcontractors to adopt international environmental standards.
- Meet or exceed all applicable regulations. Where no regulation exists, set and adhere to our own high standards.
- Continuously improve environmental performance and optimise resource consumption, practising conservation and recycling.
- Minimise environmental impacts by optimising products, processes, services and transportation taking the whole lifecycle into consideration.
- Co-operate and communicate actively with authorities, communities, suppliers and customers.
- Develop and select new products, services and processes with less total environmental impact.
- Educate and motivate workers to be actively engaged in increased environmental responsibility.
- Integrate environmental and health & safety aspects.
- Assess in advance the potential environmental impacts related to all important decisions like major investments, acquisitions, expansions, etc. and balance economic considerations with environmental alike.
- Establish environmental operating procedures and practices and measure progress of environmental performance.
